To win, all you need is the right truck, and that truck is the Western Star. It flat out works, day after day. No excuses. No complaints. That’s because this is the work truck that was built to be a work truck. And we have a whole family that can be customized to do whatever you need.

In fact, building trucks exactly how you want them is something we’ve been doing since the first one came off the line over 50 years ago — each one ready to take on any job with the guts to come back for more. Durable, reliable and rugged. No wonder Stars are the trucks real pros turn to.
To us, close enough just isn’t good enough.
What if your choice of an engine, close enough just isn’t good enough? So for construction applications, we offer a variety of engines with horsepower and torque ratings to match your job. Getting what you want has never been easier.

DEMAND POWER AND EFFICIENCY.

Detroit™ engines are engineered to deliver the excellent power and fuel economy you depend on while still meeting today’s efficiency requirements. That’s why each engine we build is 2016 OBD (OBD16) Certified and compliant with 2017 Greenhouse Gas (GHG17) regulations. So you can count on a powerplant that will run clean and strong for many miles to come.

BODY BUILDER FRIENDLY.

We make trucks with the body builder-specific options that are designed to reduce installation time and ensure years of trouble-free operation. Plus, since we build each truck to your specifications, anything is possible. Pre-punched frame rails, front frame extensions, point-to-point power distribution, ample room between the seats to install controls and the list goes on. Just ask your dealer.

WESTERNSTAR.COM
A nice place to call work.

START WITH THE RIGHT FOUNDATION.
Western Star gives you a wide selection of choices to create the perfect spec for your application. With several frame rail options and wheelbase lengths available in one-inch increments from 150 inches to over 400, our flexibility is a big reason why we can build the exact truck you need.

Safe and sound.
Our cabs are built to keep you safe. Bonded instead of riveted, precision welded for strength, a coating process for long lasting corrosion resistance and a superior paint finish. And for extreme-duty applications, Western Star also offers a severe service cab option with additional reinforcements to withstand anything you can throw at it.

STAY IN THE FIELD.
You work your trucks hard, so sometimes they need a little attention. Stars are designed for incredible durability and serviceability, with features like Grade 8 frame fasteners, copper brass radiators, as well as in-cab fuse panels so you can make quick repairs in the field and keep on working.

Twin steer and more.
Straight from the factory, with Western Star, you can add factory-installed twin steer or all-wheel drive options, as well as factory drop axle. Or we can even customize a package so you get what you need at a lower cost, all backed by manufacturer support and a single factory warranty. And if you’re looking for suggestions, our Customer Application Engineering Department is standing by to help you create the right truck for the job.

Western Star trucks are built to perform, with the high-quality components that stand up to the challenge of hard work. Sure, you can buy a cheaper truck. But that only costs you in the long run.
